CAREER SUMMARY

Detail-oriented and motivated individual with strong analytical and problem-solving abilities. Capable of interpreting data, identifying trends, and useful meaning insights to support informed decision-making.

EDUCATION

Gandhi Engineering College — (CGPA:- 8.97)

Nov. 2022 – May. 2026

Royal College of Science And Technology — (Percentage-90.83)

Jul. 2019 – May 2021

SKILL DEVELOPMENT PROGRAMS

Artificial Intelligence And Machine Learning

July 2025 – August 2025

Central Tool Room and Training Center

Bhubaneswar, Odisha

- Gained hands-on experience in machine learning algorithm and data preprocessing using Python. Worked with libraries like seaborn, scikit-learn, Pandas, and NumPy for model development and evaluation.
- Visualized datasets and model results using Matplotlib and Seaborn for better data interpretation.

Cyber Security

July 2024

Skill India Digital Hub

Online Mode

- Gained knowledge of cybersecurity fundamentals including network security, encryption, and ethical hacking.
- Learned to identify and mitigate common threats like malware, phishing, and SQL injection attacks.
- Understood basics of security policies, firewalls, and incident response planning in real-world scenarios.

NIIT For Soft Skills

Program In Professional Edge Career Essentials

- Completed the Soft Skills Program in Professional Edge Career Essentials from NIIT, gaining vital communication, leadership, writing skills and workplace effectiveness competencies.

PROJECTS

Diwali Sales Analysis | Python, Libraries

- Conducted in-depth sales data analysis on 10K+ records using Pandas and NumPy ,Built data visualizations to uncover trends in customer demographics and purchasing behavior.
- Applied groupby, aggregation, and sorting techniques to identify high-revenue segments and Created dashboards/plots to communicate findings effectively.

Dashboards | PowerBI

- **MOBILE SALES:** Designed a Power BI sales analytics dashboard using real-world dataset. Used DAX measures to calculate total sales, average revenue, and transactions,Performed time-series analysis to track monthly sales trends. Built geo-visualization (map) to analyze city-wise sales distribution ,Evaluated customer payment behavior using pie chart insights and Enabled interactive filtering using slicers and drill-down features.
- **HEALTH CARE:** Designed a healthcare analytics dashboard using Power BI for patient and revenue analysis and Performed department-wise and doctor-wise analysis to identify workload distribution. Conducted geographical analysis of treatment costs across multiple cities and Enabled interactive reporting using slicers and dynamic visuals.

Minor Projects | Python

- Calculator with History
- Password Guess and Number Guess
- Fake News Generator and Quiz Game

CERTIFICATES

NPTL: Introduction to Machine Learning

TECHNICAL SKILLS

Languages: Python, SQL

Developer Tools: VS Code, Jupyter, PowerBI, Excel

Coding Platforms: HackerRank
